Experience

Amazon Web Services (AWS), Systems Development Engineer

Dublin, Ireland, Nov 2025 – present

- Delivered the Route 53 [CIDR routing](#) feature end-to-end in the European Sovereign Cloud 4 months ahead of schedule, implementing infrastructure, APIs, and console support for customer-configurable IP-based DNS routing.
- Led the refactoring of 184 Route 53 infrastructure pipelines, increasing pipeline freshness to 98% in eusc-de-east-1.
- Redesigned DNS infrastructure, eliminating a recurring misconfiguration that generated 84 SEV-2 alerts over six months across all AWS partitions.
- Unblocked a strategic customer launch by delivering [DNSSEC](#) support for Route 53 in AWS European Sovereign Cloud 3 weeks ahead of schedule, allowing the customer to migrate without modifying their existing infrastructure.
- Maintained reliability of [Route 53](#) services in sovereign regions, achieving 99.999% availability through incident response and RCA-driven improvements.

NTT Data, Cloud Engineer

Cosenza, Italy, Jan 2025 – Oct 2025

- Built CI/CD pipelines on GCP to deploy Dataflow pipelines processing 10k+ daily records, improving data availability and release reliability.
- Designed multi-cloud infrastructure (AWS + on-prem) using Terraform and Kubernetes, improving deployment consistency and reducing failure rates by 70%.
- Developed microservices (Quarkus, Crossplane) to automate infrastructure policy management and optimize cloud resource allocation.

Vision One, Software Engineer

Recanati, Italy, July 2024 – Dec 2024

- Developed scheduling system in .NET/Blazor, improving task allocation efficiency by 80%.
- Refactored legacy codebase, reducing unused code by 60% and improving maintainability.
- Introduced automated testing (xUnit), increasing test coverage to 80%.

Caliò Informatica, Software Engineer

Cosenza, Italy, Mar 2024 – July 2024

- Developed workflow-building capabilities for AIDA, an OpenAI-powered automation platform, enabling non-technical users to create AI workflows through a visual drag-and-drop interface inspired by n8n.
- Optimized OpenAI API consumption through request redesign and prompt engineering strategies, reducing operational costs by 80% while improving response performance by 60%.

Skills

Certifications: AWS Solutions Architect Associate, Certified Kubernetes Administrator (CKA), Google Associate Cloud Engineer, Terraform Associate

Languages: Java, C#, Python, C++, TypeScript, JavaScript, Bash, PowerShell, C

Cloud: AWS, GCP, Azure

Infrastructure: Kubernetes, Terraform, Docker, Ansible

Backend: Spring Boot, Quarkus, .NET, Django, FastAPI

Frontend: React, Angular, Blazor

Databases: PostgreSQL, SQL Server, MongoDB, Redis, DynamoDB

Observability: Prometheus, Grafana

Education

Università della Calabria, M.Sc. in Artificial Intelligence and Machine Learning – GPA: 4.0/4.0

- Completed all coursework except 4 exams before accepting a full-time Systems Development Engineer position at AWS.
- Relevant coursework: Artificial Intelligence, Machine Learning, Computer Vision, Distributed System, Knowledge representation and reasoning, Statistical Learning

Università della Calabria, B.Sc. in Computer Engineering – GPA: 4.0/4.0

- Relevant coursework: Operating Systems, Computer Networks, Database Systems, Object Oriented Programming, Software Engineer

Extra

- Won the AWS Jam for NTT Data.
- Participated in the MLSysOps Hackathon, designing Kubernetes-based policies for reliable ML deployments with Prometheus/Grafana observability, autoscaling, and automated rollouts.
- [Lead The Future Mentee](#), a highly selective STEM mentorship program with an acceptance rate below 20%.
- Maintainer of Unical<3Telegram, GitHub platform used by 2000+ DIMES students for exam preparation and resource sharing unicallovetelegram.github.io/IndiceArgomentiOrale.
